Grundfos COMFORT TA with AUTOADAPT: Hot water recirculation the clever way

COMFORT pumps are efficient circulators designed for hot water recirculation in residential buildings with a dedicated return line. The pumps are compatible with all types of water heater tanks, tankless systems, and solar or heat pumps regardless of whether the system has mixing or tampering valves installed.

COMFORT TA with our innovative AUTOADAPT Control mode incorporates an external sensor on the supply pipe for rapid detection of hot water usage. This enables the pump to quickly learn usage patterns throughout the day, differentiating between mornings, evenings, weekdays, weekends, and periods of inactivity such as vacations.

Using these insights, the pump operates at predicted times, ensuring hot water is available only when needed. After 24 hours of no hot water usage, the pump automatically enters vacation mode, resuming operation upon detecting hot water demand. During the initial two weeks after installation, the pump frequently starts based on temperature control, ensuring immediate comfort while learning usage patterns. Once a week, the pump runs a 15-minute disinfection (anti-legionella) cycle. The water heater must enable that function once a week.

In addition to AUTOADAPT, our pump offers the TEMPERATURE+ mode, which activates the pump when water temperature drops below a certain level. This mode also includes a vacation setting for enhanced energy efficiency.

Easy sizing

Pump performance is ideal for one or two-family private homes.

Instant hot water

Improves comfort and eliminates waiting for hot water.

Water savings

Saves up to 10,000 gal. / 38,000 litres of water annually.

Improved hygiene

Water stagnation, bad smell and bacteria formation is avoided by frequent recirculation.

Ø

Low energy consumption

AUTOADAPT control mode significantly reduces the heat energy consumed by the water heater and saves up to 67% heat energy compared to a continuously running pump.

Technical data

Flow, Q _{max}	0.5 m³/h
Head, H _{max}	1.2 m
Liquid temperature	2 °C - 95 °C
Power	5 W - 7 W
Noise	22 dB(A)
Drinking water approvals	UBA, ACS, WRAS, UL

Discover more

Take an in-depth exploration of the COMFORT range in our free Ecademy course. You'll discover the various control modes, how to install and set up, and all about the benefits of COMFORT and hot water recirculation.

Possibility in every drop

Choose the best hot water recirculator for you

Each pump in the COMFORT range is designed to provide maximum comfort with minimised energy consumption. Selecting the right one is as simple as determining which control mode suits each household's needs. Compared to continuous operation, different control modes can also further reduce recirculation heat energy losses.

Easy maintenance

Reduced cost of installation

Universal replacement

Design features:

· Prevents pipe erosion and pin holes

Compliant with pipe manufacturers' recommendations on flow velocity limits for 15mm / 1/2" and 20mm / 3/4" pipe dimensions.

No clogging

Semi-spherical motor design ensures maximum resistance against blockage caused by lime in water of unlimited hardness.

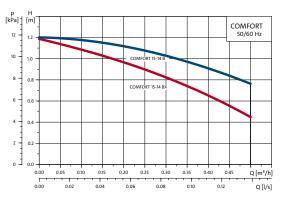

Easy installation

Compact design for installation in confined spaces, even with the pump head pointing downwards. The line cord enables quick electrical connection.

Dry-running protection

Ensures long pump lifetime and hassle-free commissioning.

Performance curves

Product	Type key	Port to port length	Connection
97916771	COMFORT 15-14 B	80 mm	Internal thread Rp 1/2"
97916772	COMFORT 15-14 BX	140 mm	Non-return and isolating valves, External thread G 1"

93094846	COMFORT 15-14 BX T	140 mm	Non-return and isolating valves, External thread G 1"
93093537	COMFORT 15-14 B TDT	80 mm	Internal thread Rp 1/2"
93093665	COMFORT 15-14 BX TDT	140 mm	Non-return and isolating valves, External thread G 1"
97916757	COMFORT 15-14 B TA	80 mm	Internal thread Rp 1/2"
97916749	COMFORT 15-14 BX TA	140 mm	Non-return and isolating valves, External thread G 1"

The detachable design of the head allows cleaning of the pump in no time.

without need for permanently installing additional vent valve or hose bib.

Pump head designed to fit all brass pump housings from different brands.

Non-return and shut-off valves included in X variant and variants for North America.

Optional venting flange available, providing a simple way to vent or drain the system
